

List of posters

Bioinformatics

P01: Correlation analysis and multimodal molecular imaging

Gert B. Eijkel, Ron M.A. Heeren

P02: Normalization of large-scale mass spectrometry-based metabolic profiling experiments

Bedilu Ejigu, Dirk Valkenborg, Tomasz Burzykowski, Maya Berg, Jean-Claude Dujardin

P03: Hierarchical Application of Principal Component Analysis in Mass Spectral Imaging Analysis

Yousef El Aalamata, Raf Van de Plas, Nico Verbeeck, Bart De Moor, Etienne Waelkens

P04: High Speed Data Processing for Imaging MS-Based Molecular Histology Using Graphical Processing Units

Emrys A. Jones, René van Zeijl, André M. Deelder, Per E. Andrén, Lex Wolters, Liam A. McDonnell

P05: MsXelerator: A Software Suite for LC- MS based Metabolomics

Marco. M.A. Ruijken

P06: Inter-tissue Comparison of Mass Spectral Imaging Data Using Group Independent Component Analysis (GICA)

Nico Verbeeck, Raf Van de Plas, Yousef El Aalamat, Bart De Moor, Etienne Waelkens

Current applications

P07: Electrochemically assisted reduction of disulfide bonds of peptides and proteins with on-line mass spectrometric detection

Jean-Pierre Chervet, Agnieszka Kraj, Hendrik-Jan Brouwer, Nico Reinhoud

P08: High Mass Accuracy Provides Enhanced Selectivity for the GC/MS Analysis of Pesticides in Food

Thomas Doherty, Ben Baars, Phil Wylie, Chris Sandy, Bill Russ

P09: Mass Spectrometric Imaging of the Lipidome in Breast Tumor Xenograft Models

Kamila Chughtai, Lu Jiang, Tiffany R. Greenwood, Kristine Glunde and Ron M.A. Heeren

P10: Application of UPLC NanoTile™ MS/MS in the Analysis of Samples from Chimeric Mice with Human Livers

Jan Claereboudt, Richard Gallagher, Raimund Peter, Kathryn Pickup, Kristin Samuelsson, Sunil Sarda, Ian Wilson, Leonard Dillon and David Douce

P11: Accurate Mass LC/MS/MS an Emerging Tool for Quantification in Bioanalysis

Jan Claereboudt, Robert S. Plumb, Paul D. Rainville, Joanne Mather

P12: Cytochrome P450 activity in children with severe hepatic dysfunction: application of a UPLC-MS/MS method

L. De Bock, K. Boussery, M. Van Winckel, P. De Paepe, X. Stephenne, E. Sokal, J. Van Bocxlaer

P13: Characterization of the charge-based heterogeneity in a monoclonal antibody using LC-MS approaches

Wilbert Deceuninck, Wendy Pluk, Eef Dirksen

P14: Monitoring monoclonal antibodies during various stages of development using mass spectrometry

Eef Dirksen, Wendy Pluk, Wilbert Deceuninck

P15: Disulfide bond scrambling in partially reduced and alkylated peptides revealed by Ion Mobility Mass Spectrometry

Julien Echterbille, Loïc Quinton, Edwin De Pauw

P16: Structural Characterization of Rotaxane-C12 by Mass Spectrometry

M. C. Duursma, D. F. Smith, R. M. A. Heeren, M.R. Panman, A. M. Brouwer, B. H. Bakker, S. Woutersen and A. M. Rijs

P17: Synthesis and characterization of cyclic (co)polymer structures

T. Josse, O. Coulembier, J. De Winter, P. Gerbaux, Ph. Dubois

P18: Application of an RPLC-MS carboxylic acid derivatization strategy to clinical samples

D. Kloos, M. Giera, H. Lingeman, O.A. Mayboroda, W.M.A. Niessen, A.M. Deelder

P19: Ion Mobility/Mass Spectrometry and top-down Electron Transfer Dissociation of Intact Myoglobin

Lermyte, F, Valkenburg, D, Sobott, F.

P20: Multimodal Mass Spectrometric Imaging of Tumor Heterogeneity in Breast Cancer

N.E. Mascini, S. Chughtai, G.B. Eijkel, P. Ter Brugge, J. Wesseling, R.M.A. Heeren

P21: LC/IRMS analysis: a powerful technique to study carbon cycling in benthic diatom mats

T.C.W. Moerdijk-Poortvliet, T. Miyatake, L.J. Stal, H.T.S. Boschker

P22: Peptide Mapping of a Recombinant 60-kDa Envelope Glycoprotein for Product Comparability

Marc Louckx, Monique Dewez, Xavier Czeszak, Ghislain Delpierre, Dominique Plainchamp, Michel Plisnier

P23: Biosolve B.V.

Fred Ploeg

P24: The Therminator (polymerase) said "I'll be back"

Xiao-Ping Song, Miyeong Jang, Piet Herdewijn en Jef Rozenski

P25: Antibody Characterization by Top-Down and Bottom-Up Mass Spectrometry

Kai Scheffler, Sebastian Hogl, Peer-Hendrik Kuhn, and Stefan Lichtenthaler

P26: Quantitative profiling of oxylipins via comprehensive LC/MS analysis: Application to patients undergoing cardiac surgery

K. Strassburg, A. M.L. Huijbrechts, K. Kortekaas, J. Lindeman, T. L. Pedersen, J. W. Newman, A. Dane, R. Berger, T. Hankemeier, J. Van Duynhoven, E. Kalkhoven, R. Vreeken

Identification

P27: Comprehensive bioaffinity mass spectrometry approach for thyroid transporter agonists

Payam Aqai, Christos Fryganas, Willem Haasnoot, Michel W. F. Nielen

P28: Analysis of tobacco mainstream smoke by GC×GC TOFMS

Michał Brokl, Jean-François Focant, Louise Bishop, Christopher G. Wright, Chuan Liu, Kevin McAdam

P29: Label-free quantitation of the heat stress-induced changes in the wall proteome of the pathogenic fungus *Candida albicans* reveals new potential vaccine targets

Clemens J. Heilmanna, Alice G. Sorigo, S. Sepehr Mohammadi, Grazyna J. Sosinska, Henk L. Dekker, Stanley Brul, Leo J. de Koning, Chris G. de Koster, Frans M. Klis

P30: A shotgun metaproteomics approach to study the microbiome of Cystic Fibrosis (CF) patients

Griet Debysier, Bart Mesuere, Peter Dawyndt, Peter Vandamme, Bart Devreese

P31: Mass spectrometry investigation of structure/ biological activity relationships of saponins in the seastar *Asterias rubens*

M. Demeyer, P. Flammang, P. Gerbaux

P32: High Sensitivity Bioanalysis using chip based micro LC/MS

Lieve Dillen, Willy Cools, Marc Verhemeldonck, Marc De Meulder, Ronald de Vries and Filip Cuyckens

P33: Analysis of Mannosylerythritol lipids by Normal Phase Liquid Chromatography Atmospheric Pressure Photo Ionization Mass Spectrometry

Wilma du Chatinier, Hans-Gerd Janssen

P34: Effect of ApoE isoform and lipidation status on proteolytic clearance of the Amyloid-beta peptide

Hubin, E., J. Rozenski, Subramaniam, V., Van Nuland, N., Broersen, K.

P35: Study of glycosylation of Antibodies produced in serum-free medium

Pierre Jonlet, Nicolas Smargiasso, Sophie Waxweiler, Alfred Collard, Edwin De Pauw.

P36: High-resolution metabolic profiling towards G-protein coupled receptors: rapid and comprehensive screening of histamine H4 receptor ligands

J. Kool, A.F. Rudebeck, F. Fleurbaaij, S. Nijmeijer, D. Falck, R. Smitsc, H.Vischer, R. Leurs and W.M.A. Niessen

P37: Identification of electrochemically synthesized metabolites using high resolution multistage mass spectral trees

Agnieszka Kraj, Miguel Rojas-Cherto, Marco Rie, Hendrik-Jan Brouwer, Nico Reinhoud, Rob Vreeken, Theo Reijmers, Jean-Pierre Chervet

P38: Expanding Role of Electrochemistry/Mass Spectrometry in Life Sciences

Agnieszka Kraj, Hendrik-Jan Brouwer, Nico Reinhoud, Jean-Pierre Chervet

P39: CE-TOF-MS analysis of intracellular metabolites

Hiroshi Kuwahara, Bea Reeuwijk, Peter Lindenburg, Ji Yuan, Wang Liewei, Weinshilboum Richard, Rima Kaddurah-Daouk, Rob J. Vreeken, and Thomas Hankemeier

P40: Structure characterization of rotenone fragmentation and of the thermal degradation products of rotenone using electrospray mass spectrometry

E. Lautié, M. Claeys, and J. Quetin-Leclercq

P41: Etd Vs Cid Fragmentation Of Non-Labeled And Labeled Desmosine And Isodesmosine

Ongay S., Hermans J., Nieuwend R., Overkleeft H., Bischoff R.

P42: Evaluation of Protocols for Probing the lysine acetylome

Harm Post, Maarten Altelaar and Albert J.R. Heck

P43: Mass spectrometric characterization of tracers for α -pinene secondary organic aerosol formed under simulated conditions

M. Safi Shalamzari, R. Vermeylen, J.-F. Doussin, and M. Claeys

P44: Real-time analysis of sulphur containing volatiles emitted from larvae-infested Brassica plants using Proton Transfer Reaction Mass spectrometry

Devasena Samudrala, Elena Crespo, Simona M Cristescu, Nicole M. Van Dam, Frans J M Harren

P45: Discovery and Identification of True Unknown Compounds in River Water by UPLC-QToF MS

Marijn van Hulle, Kenneth Rosnack, Eleanor Riches, Hilary J. Major, Keith Worrall

P46: Analysis of High Molecular Weight Phthalates in Sediment Using Atmospheric Pressure GC Coupled to a Time of Flight Mass Spectrometer

Marijn van Hulle, Jean-Marc Joumier, Ken Rosnack, Joe Romano, Frank David, Pat Sandra and Peter Hancock

P47: Study on decomposition products of norbixin during bleaching with hydrogen peroxide and a peroxidase by means of UPLC-UV and mass spectrometry

Wibo B. van Scheppingen, Ilco A.L.A. Boogers, Alexander L.L. Duchateau

P48: Increasing Protein Identifications On A Q-ToF Mass Spectrometer

P. D. Perkins, H. Yin, C. Mille, J. Meza, N. Kitagaw, W. Tang, [Joachim Thiemann](#)

P49: A Metabolomic Study On A Specific Pathway Change In Human Cells During Drug Treatment

[J. Thiemann](#) , S. S. Lateef , R. Gudihal , S. Joseph , S. Rajagopalan

P50: Breaking the 2000 proteins barrier in a standard LC run using a new Orbitrap benchtop instrument and multiple search engines

Carmen Paschke, Markus Kellmann, Yue Xuan, Eugen Damoc, Torsten Ueckert, Hans Greseman, Ute Comberg, [Wilfried Voorhorst](#)

P51: Orbitrap mass spectrometry with resolving powers above 500,000 and 1,000,000 on chromatographic time scale

[Wilfried Voorhorst](#), Eugen Damoc, Alexander Makarov, Oliver Lange

Non-mainstream

P52: Relative quantification of bi-specific Antibody mixtures by native Mass Spectrometry

[Arjan Barendregt](#), Sara Rosati, Natalie J. Thompson, Linda Hendriks, John de Kruif, Mark Throsby, Esther van Duijn, Albert J.R. Heck

P53: Analyzing Small Organic Molecules in Complex Mixtures Usin Ion Mobility Mass Spectrometry: A Whole New World

[Boschmans Jasper](#), Sobott Frank, de Bruijn Ernst, Lemièrè Filip

P54: Conformational and association space of SMC and its accessory proteins by native IM-MS

[Annika Butterer](#), Emma Gwynn, Mark Dillingham, Frank Sobott

P55: Secondary ion mass spectrometry reveals a different composition and distribution of molecules in human normal and osteoarthritic cartilage

[Berta Cillero Pastor](#), Gert Eijkel, Andras Kiss, Francisco J. Blanco García, Ron M.A. Heeren

P56: Automated gas-phase H-D exchange within a Q-ToF Mass Spectrometer

[Jan Commandeur](#), Sebastian Tittebrandt, Wolf Lehmann

P57: Ion Mobility Enhanced Hydrogen-Deuterium Exchange Mass Spectrometry

[Perry Derwig](#), Michael Eggertson, Keith Fadgen, Martha Stapels, John R. Engen, Thomas Wales

P58: HILIC-MRM Assays Targeting for Analyzing Site-Specific Glycans of Multiple-Site Glycosylated Proteins and Glycoprotein Mixtures

[Perry Derwig](#), Hongwei Xie, Joe Rinner, Weibin Chen

P59: Formation, identification and bioaffinity assessment of small molecule kinase inhibitors in an integrated system: Electrochemistry-LC-p38 kinase binding assay/MS

[D Falck](#), JSB de Vlieger, M Giera, M Honing, J Kool and WMA Niessen

P60: Unimolecular fragmentation of the iodomethane cation : a maximum entropy analysis

[Nicolas Fiévez](#), Robert Loch, Bernard Leyh

P61: Gas phase peptide fragmentation chemistry elucidated by IRMPD spectroscopy

[Josipa Grzetic](#), Jos Oomens

P62: Improved Isolation and Scan Performance for Rapid Tandem MS Experiments in a Spherical Ion Trap

Desmond Kaplan, Andreas Brekenfeld, Christoph Gebhardt, [Chris Hendrix](#), Andrea Kiehne, Ralf Hartmer and Thorsten Ledertheil

P63: Single particle ICP-MS, a Screening Tool for Nanoparticles

Ruud Peters, Martijn van der Lee, Hans Marvin, Stefan Weigel and Hans Bouwmeester

P64: Lenses or No Lenses? A Study of Ion Transfer Efficiency at Interfaces in a Lens-free Triple Quadrupole MS

Govert Schröder, Felician Muntean and Roy Moeller

P65: A native MS based structural model of a picorna-like virus capsid

Joost Snijder, Charlotte Uetrecht, Rubén Sanchez, Jon Agirre, Diego Guérin, Gijs Wuite, Wouter Roos, Albert Heck

P66: Trapped Ion Mobility Spectrometry – Mass Spectrometry (TIMS-MS) for the Analysis of Biomolecules

Rob van der Heijden, Desmond A. Kaplan, Francisco Fernandez-Lima, Mark Ridgeway and Melvin A. Park

P67: Isotopically Resolved FTICR Mass Spectrometry Of Proteins Above 100 Kda At 7 Tesla

Patrick van Houts, Eugene N. Nikolaev, Ivan A. Boldin, Roland Jertz, Jens Fuchser, Claudia Kriete and Gökhan Baykut

P68: High-mass Q-ToF upgrade for MS/MS studies of intact noncovalent complexes

Jan Commandeur, Michèle Sons, Terry Connolly and Nico Wortel

Quantification

P69: A proteomic approach to understand mDia2 biology

A. F. Maarten Altelaar, Tadamoto Isogai, Rob van der Kammen, Soenita S. Goerdayal, Metello Innocenti, Albert J.R. Heck

P70: Development of an LC/MS assay for the bacterial transglycosylation reaction

Bart Blanchaert, Eefjan Breukink, Tine Wyseure, Paul Declerck, Erwin Adams and Ann Van Schepdael

P71: Reduction of Interferences in Bioanalysis Using Differential Mobility Spectrometry - Mass Spectrometry with Chemical Effects

Doina Caraiman, J.C. Yves Le Blanc, Bradley Schneider, Larry Campbell, Hesham Ghobarah, Ernst Bouvin

P72: Electron Impact Sputtered Neutral Mass Spectrometry (SNMS) using the Hiden EQS Energy Resolving Quadrupole Mass Spectrometer

G Cooke, S Davies, D.L. Seymour

P73: Proteomic analysis of Mycobacterium tuberculosis: towards comprehensive proteome coverage?

Jeroen de Keijzer, Tridia van der Laan, Arnoud de Ru, Dick van Soelingen, Peter van Veelen

P74: Fast and Sensitive Target Compound Quantification and Confirmation with a New Triple Quadrupole Acquisition

Martin Haex, Michael Flanagan

P75: Extending the Linear Dynamic Range and Limits of Detection of a Quadrupole Time-of-flight (TOF) Mass Spectrometer Down to the Low Parts-Per-Trillion Range

Martin Haex, Bill Barry

P76: Methods to quantify the phytochemical richness of a diet

Boudewijn Hollebrands, Hans-Gerd Janssen, Herrald Steenbergen, Raymond Baris

P77: A large-scale method to measure absolute stoichiometries of cysteine redox status and dynamics of the thiol redox proteome

George MC Janssen, Emmely E Treffers, Marina D Kraaij, Mark Ruben, Arnoud H de Ru, Cees Van Kooten, Hermen Overkleeft, Kyra A Gelderman, Peter A van Veelen

P78: Quantitative Secondary Ion Mass Spectrometry measurement of corticosteroids

Andras Kiss, Don F. Smith, Diego F. Cobice, Ruth Andrew, Ron M. A. Heeren

P79: TBA: an Analytical Challenge with an Odor...

Willy Janssens, Koen Vanhoutte, Gorm Yoder, Joe Daknis, Heiko Rinderhagen and Martin Kleiner

P80: Discovery and Validation of Novel Biomarkers for Gaucher Disease

Gertjan Kramer, Marco van Eijck, Hans Vissers, Dave Speijer, Hans Aerts

P81: Use of human dried-blood spots as a minimally invasive method to assess internal exposure to persistent organic pollutants

L'Homme B, Brasseur C, Focant JF

P82: Translation from HCD discovery to SRM assay

Gianluca Maddalo, Patrycja A. Puchalska, Erik L. de Graaf, Arjen Scholten, Maarten A.F. Altelaar, Albert J.R. Heck

P83: Quantitative analysis of intracellular metabolites using ion pair reversed phase liquid chromatography tandem mass spectrometry

R. Maleki Seifar, C. Ras, J.C. van Dam, W. M. van Gulik, J.J. Heijnen

P84: Development of a chip based quantitative method for phosphoproteomics

Ayse Nur Polat, Reinout Rajmakers, Karsten Kraiczek, Shabaz Mohammed and Albert J. R. Heck

P85: Comprehensive Analysis Of The B-Vitamin Complex In Food And Beverages By LC MS/MS

Stacy Tremintin, Christopher Borton, Rebecca E. Wittrig, Andre Schreiber, Bertram Nieland

P86: Evaluation of the Sensitivity Benefits of Micro-flow Liquid Chromatography

Anthony J. Romanelli; David Guillen; Stephen Lock; Roddy Poody; Jay Corr; Peter N. Kovarik; Paren Patel; Thomas R. Covey

P87: New Approaches on HRAM LC-MS/MS for Quantitation and Confirmation with Pesticides Analysis

Frans Schoutsen, Sebastian Westrup, Catharina Crone

P88: Towards Automated Medium Throughput Metabolomics

Zacharias D. Sofianos, Bert Ooms, Rob J. Vreeken and Thomas Hankemeier

P89: Profiling and Quantitation of Metabolomic "Signatures" for Cell Cancer Progression

Eric van Beelen, Henry Shion, Irwin Kurlandc, Sumanta Goswami, David Kusin, Haitao Lu, Bhavapriya Vaitheesvaran, John Shockcorb and Alan Millar

P90: UHPLC-MS/MS method for the quantitative and qualitative analysis of organic acids in fermentation broths and filtrates

Burhan Ozalp, Lucien Duchateau, Erwin Kaal and Rob van der Hoeven

P91: Multiplexing SIMs on a Novel Bench Top Orbitrap with a Quadrupole Mass Filter to Increase Sensitivity for Peptide Quantitation

Stefaan Vandamme, Kevin L. Cook

P92: Multiple C-Trap Fills as a Tool for Massive Parallelization of Orbitrap Mass Spectrometry - a new Concept for Targeted Mass Analysis

Stefaan Vandamme, Jan-Peter Hauschild, Alexander Makarov, Ulf Fröhlich, Catharina Crone, Yue Xuan, Markus Kellmann, Andreas Wieghaus

P93: Analysis of cocaine, amphetamine, morphine, methadone and buprenorphine in human hair by LC-HESI-Triple Quadrupole mass spectrometry

M. Brambilla, R. Zuiderent, B. Duretz, L. D'amato, P.M. Gerthoux, P. Brambilla
